

Sulav Timal sina

Founder & Operator · Applied AI Researcher

Bhaktapur, Nepal | sulavtimal sina11@gmail.com | +977 9840052821 | linkedin.com/in/sulav-timal sina-857423219 | sulavtimal sina.com.np

Computer Engineering student who builds at the intersection of technology, business, and applied AI research. Currently owns and operates a manufacturing business, has founded and co-founded two earlier ventures, and leads a research project building the first AI voice synthesis system for an endangered Nepali language. Strong across market research, go-to-market strategy, pitching, and hands-on AI/ML and backend engineering. Six-time hackathon and competition winner.

EXPERIENCE

- Owner & Operator** , SAS Industries This fiscal year – Present
Interlock (paver block) manufacturing company in Bhaktapur. Took over the business this fiscal year, after previously running its operations as Operations Manager. Responsible for production planning, vendor and supplier relationships, client relationships, and financials.
- AI and Automation Intern (SAP Systems)** , MNA Ventures Three-month internship, concluded Aug 5, 2026
Client deployment at Sarbottam Steel Ltd. Went from no prior ERP exposure to building business reports in SAP Business One (Query Generator, Crystal Reports) and writing SQLScript stored procedures in SAP HANA. In the final month, independently built a prototype Natural Language Database Assistant: a locally-hosted LLM (Qwen3 8B via Ollama) behind a FastAPI backend turning plain-English questions into validated, read-only SQL against the real SAP HANA schema, using a hand-curated semantic layer and a sqlglot-based validation and allowlist layer for security. Demonstrated the prototype to stakeholders; production deployment is pending IT approval.
- Founder** , CQ Tech Dec 2025 – Jun 2026
Built the Pasale App to help consumer goods companies run sampled market research in Nepal's traditional retail sector at a fraction of the usual cost. Validated demand directly with consumer goods companies before building. Won Startup Summit 2025 pitching the concept to investors and industry judges.
- Co-founder and Business Lead** , KanoonAI Oct 2025 – Feb 2026 (paused)
AI legal chatbot for everyday Nepali users, plus a research assistant for lawyers. Built go-to-market from scratch: defined the ideal customer profile, ran outreach to law firms, delivered product walkthroughs, and onboarded lawyers onto the beta for structured feedback. Reached the Grand Finale of ICT Award Rising Star 2025 and was featured on national television.
- Operations Manager** , Sulav and Samyog Industries Feb 2025 – Sep 2025
Managed end-to-end operations across production planning, vendor coordination, and client deployment. Handled client-facing communication across the full commercial cycle and built relationships with suppliers and buyers under tight timelines.

RESEARCH

- Lost Voices: Sunuwar Language AI** , Nepal Engineering College (final-year project) Ongoing
Leads a three-person team building the first AI voice synthesis system for Sunuwar, a Nepali language with roughly 79,000 speakers and no existing digital resources. Covers corpus construction, a custom preprocessing pipeline, word embeddings, a custom tokeniser, training a small BERT transformer from scratch, and fine-tuning Meta's MMS text-to-speech model. Winner, Best Project Built With ElevenLabs, JunctionX Kathmandu FinnoFest 2026.

LEADERSHIP & COMMUNITY

- President** , Rotaract Club of Patan Heritage From Jul 2026
Leading Maitri E-Shikshya, a digital-literacy project training 200 women in Harisiddhi, Lalitpur on smartphone use, online safety, mobile banking, and digital inclusion, in partnership with Smart Health Global. About 1,000 indirect beneficiaries expected.
- Selected Member, 2026 Cohort** , U.S. Embassy Youth Council (USYC) Nepal Announced Aug 2026
One of 55 young Nepali leaders selected nationally for a U.S. Embassy-run leadership and civic engagement program. Also: Moderator, national panel on cyber resilience, Cybersecurity Symposium 2026; Mentor, business viability and revenue models, TechSprint Hackathon 2026 (25 teams).

RECOGNITION

- Winner**, Startup Summit 2025 (CQ Tech / Pasale)
Winner, Asian Hack 2025 (Pasale App)
- National Finalist**, Hult Prize Nepal 2025 (BioChar startup)
Best Project (ElevenLabs), JunctionX Kathmandu FinnoFest 2026 (Lost Voices)
- Grand Finalist**, ICT Award Rising Star 2025 (KanoonAI)
Winner, CodeSprint Hackathon 2025 (ride-sharing reputation layer)
Runner Up, Karmalaya-X by CARRD
Participant, X-Culture 2020, Texas, USA

EDUCATION

- Bachelor of Computer Engineering** , Nepal Engineering College, Bhaktapur 2022 – Expected Nov 2026
- Science (Physics)** , Global School of Science, Baneshwor Aug 2020 – Jun 2022

SKILLS

- Business & Strategy:** Market research, business model design, go-to-market strategy, business development, operations management, product planning, stakeholder engagement, client needs analysis.
- AI & Technical:** Python, SQL (MySQL, SAP HANA), FastAPI, Flutter, local LLM deployment (Ollama, Qwen3), sqlglot, HTML/CSS/JavaScript, Git/GitHub, transformer (BERT) training from scratch.
- Tools & Languages:** Canva, Figma, Notion, Google Workspace, PowerPoint, Word, Excel · English (C1), Nepali (native, C2), Hindi (B1).
